Organizations Thinking about using

- On-line patient portal - 70.4%
- Secure message exchange – 64.8%

Q10: What product or information would best support TH practice in your organization?

112/181

Resources

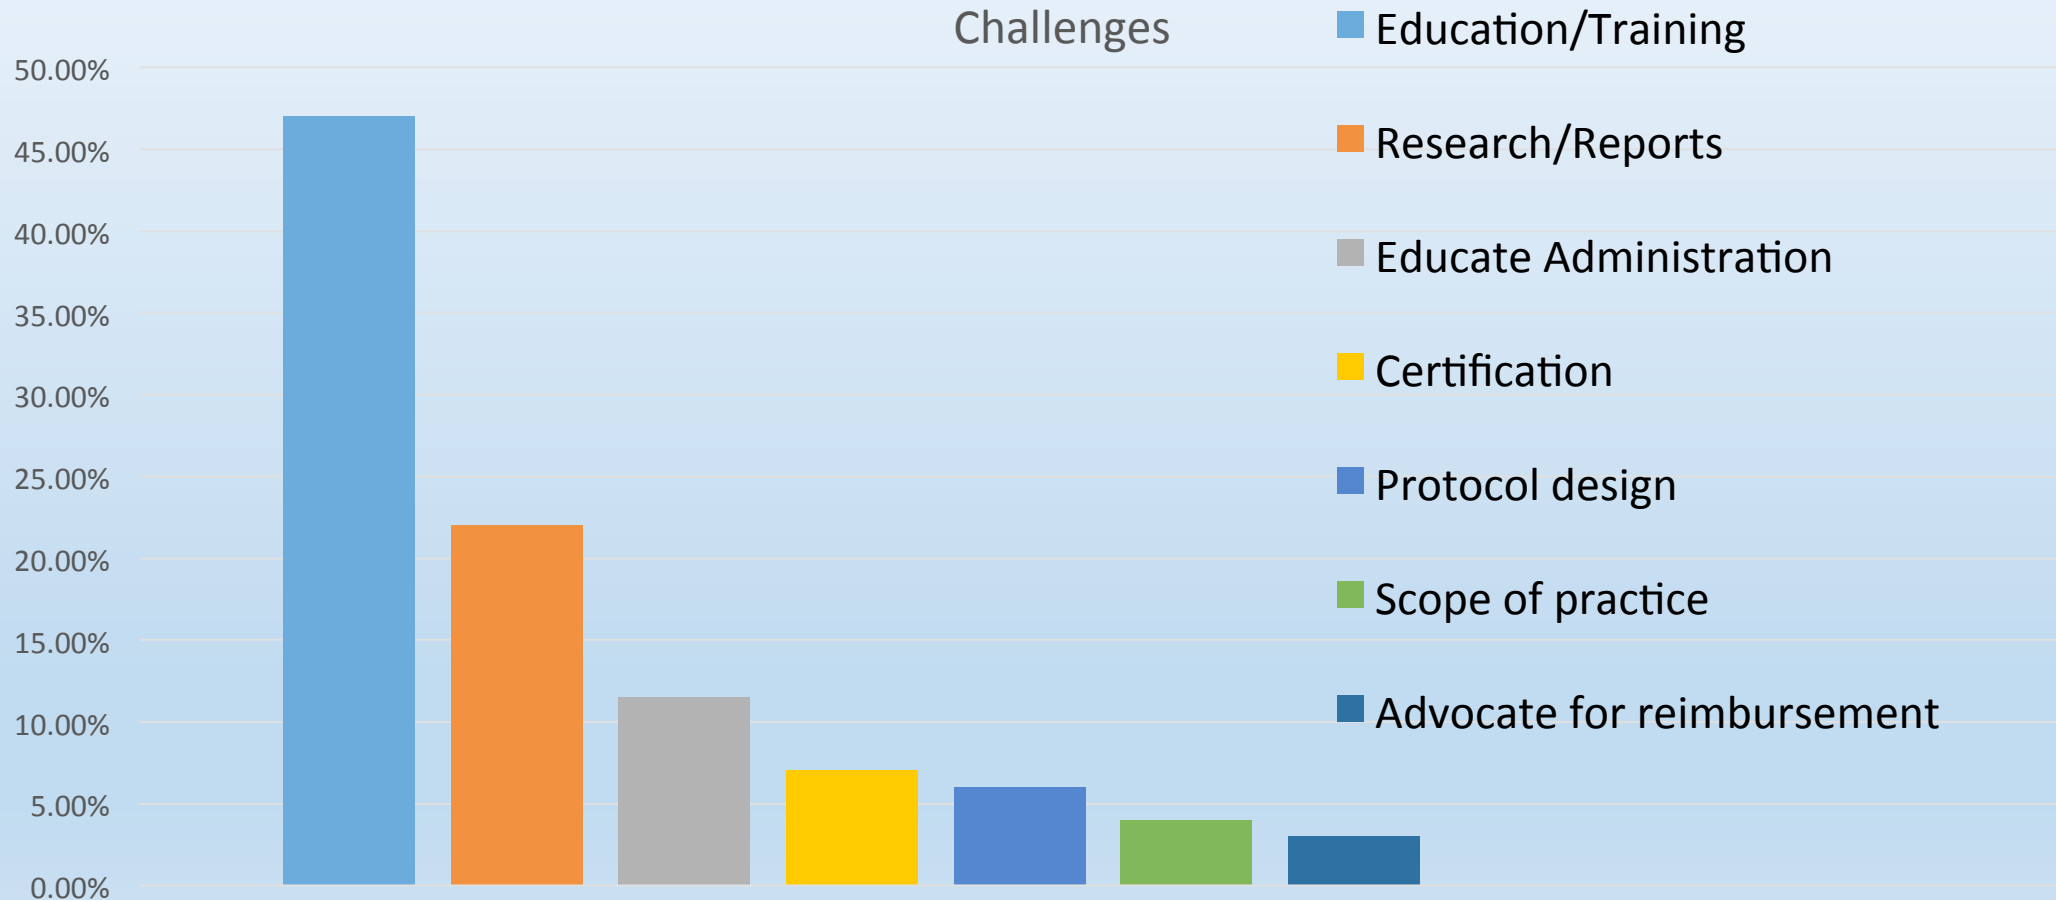

Q11: What TH nursing practice challenges do you anticipate? 193/207

Q13: What can AAACN do to help meet the challenges?

139/166

Considerations

- What is AAACN role in regard to Telehealth Practice and Standards?
- Do current Telehealth Guidelines and Standards reflect current and future state?
- Where do Telehealth Standards “fit” with current core of ambulatory care and care coordination?

Recommendation

Identify a team to charter a Task Force to:

- Examine current nursing practice standards, legislation, literature and experience.
- Recommend strategy and action plan to address opportunities.

Potential Recommendations for Task Force Charter

- Provide webinar series with CEU's
- Offer webinar in risk management for administrators
- Offer nursing practice series as chapters of *The art and science of telephone triage: How to practice nursing over the phone* (Rutenberg & Greenberg, 2012).
- Develop on-line courses for self-study and CEU's
- Leadership meeting focus/input at AAACN 2015
- Town hall to investigate solutions at AAACN 2015
- Telehealth preconference
