

New Ambulatory Care Nursing Procedures Now Available

Lippincott Solutions, a leading global provider of information and point-of-care solutions for the healthcare industry, has partnered with the **American Academy of Ambulatory Care Nursing, AAACN**, to develop a new ambulatory care nursing category for *Lippincott Procedures*—the leading online procedures resource for nurses and other clinicians at the point-of-care and in competency management.

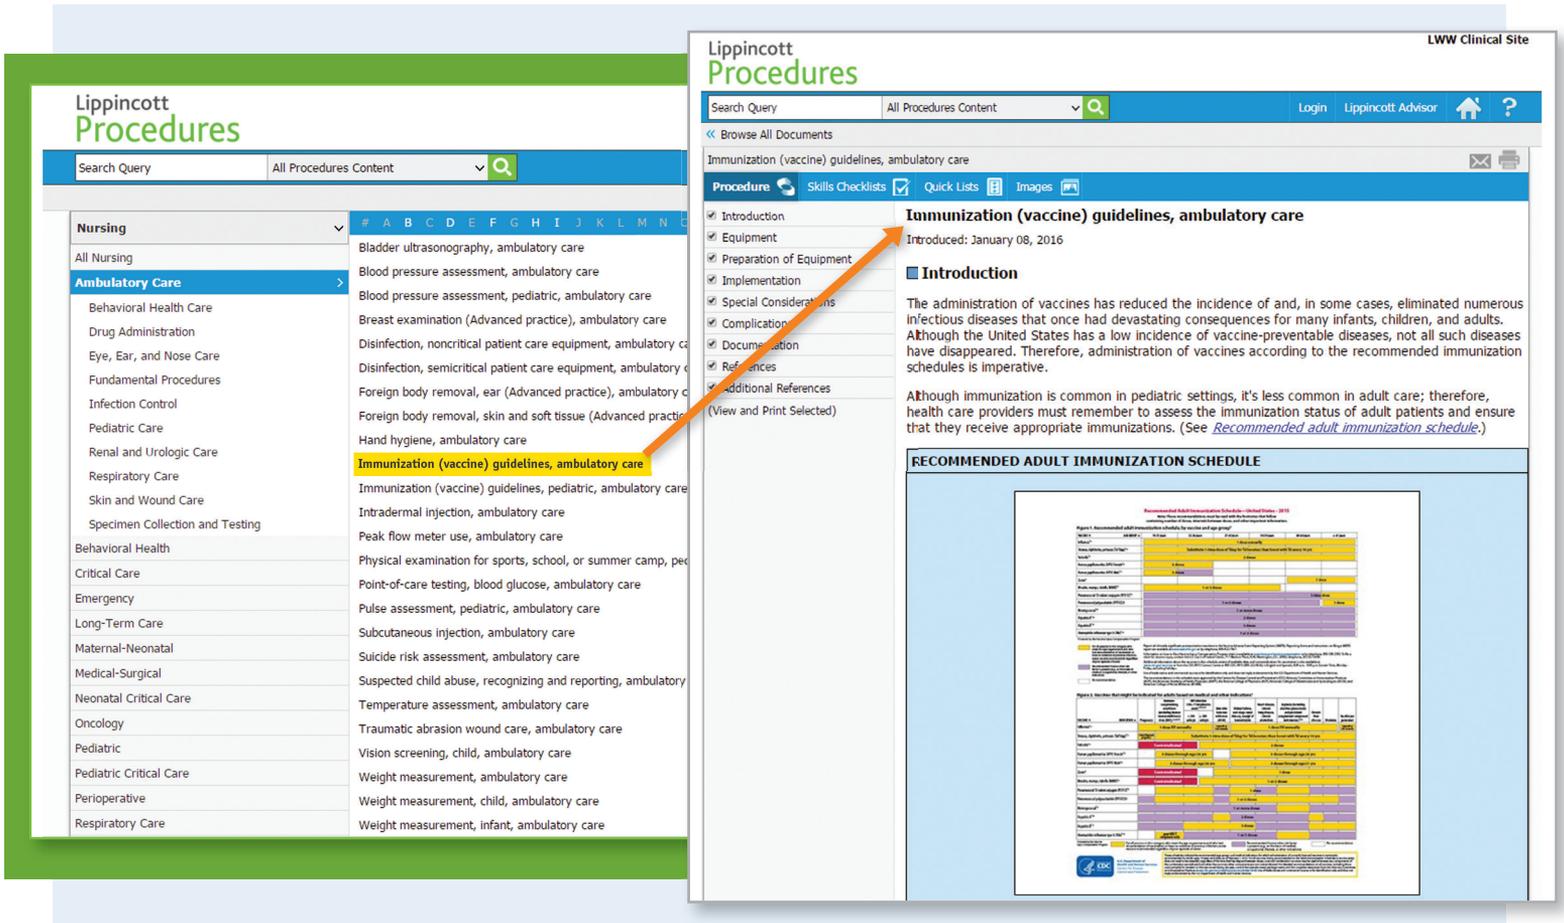

The ambulatory care nursing procedures have been written by **AAACN** members and are now available in the *Lippincott Procedures* institutional software. These new procedures cover topics such as:

- Immunization (vaccine) guidelines
- Disinfection, semi-critical patient care equipment
- Point-of-care testing, blood glucose
- Suicide risk assessment
- Traumatic abrasion wound care

As part of this collaboration, **AAACN** will write and review a total of 100 new ambulatory care nursing procedures, using experts culled from its membership. These additional procedures will be included and available in subsequent *Lippincott Procedures* content updates.

Lippincott Procedures is the most widely-used, web-based, point-of-care nursing resource for the latest evidence-based practice information utilized in hospitals and other healthcare institutions.

As part of the *Lippincott Solutions* product suite, *Lippincott Procedures* gives clinicians accurate, step-by-step guidance for more than 1,700 evidence-based procedures. It is also available as a group subscription for hospitals and other healthcare facilities.

Purchase *Lippincott Procedures* for your facility today!

To view samples of these new ambulatory care nursing procedures, and to learn more about the entire *Lippincott Solutions* product suite, call 855-695-5070, visit <http://lippincottsolutions.com>, and follow *Lippincott Solutions* on Twitter@NurseSolutions.
